

Fact Sheets/ Meetings

What is a Fact Sheet? Where can they be found? When will they be issued?

Fact Sheets are documents that are specific to a site. (A “generic” version is available upon request, or can be obtained at www.coned.com/publicissues) They contain a brief introduction, a description of manufactured gas plants, contact names and numbers, and specific to each site, a listing of the document repositories, a site background, the project status and schedule, and health exposure assessments.

Fact Sheets will be available to the community through the local elected officials, at the document repositories, which includes at a minimum the local public library, and they will be distributed at public meetings and to members of the mailing list. Requests for additional copies can be made through our MGP toll free number at (877) 602-6633.

Fact Sheets will be issued at various stages in the process. They will be issued at **minimum:**

- For the initial meeting with the community
- After the Site Characterization Work Plan (SCS) work plan has been approved by NYSDEC/NYSDOH
- At the completion of the SCS work
- After the submission of the Remedial Investigation Work Plan
- At the conclusion of the Remedial Investigation
- Prior to the public comment period
- Prior to remedial action
- During remedial action
- Post remedial action

What is a meeting? When will they be held?

Meetings can take two forms, either a public meeting, with a formal agenda, and organized by Con Edison and/or NYSDEC, or an availability session where representatives will be available for Q&A. These sessions will usually be held at community board meetings/ tenants meetings or with the property owners.

We are required under the terms of the program to have at least one meeting with the community during the Remedial Action Work Plan phase. This meeting is **mandatory**. However, representatives from Con Edison will make themselves available for either public meetings or availability sessions at the following stages:

- For the initial meeting with the community
- After the Site Characterization Work Plan (SCS) work plan has been approved by NYSDEC/NYSDOH
- At the completion of the SCS work
- At the conclusion of the Remedial Investigation
- Prior to the public comment period
- Prior to remedial action
- During remedial action
- Post remedial action
