

Gas HVAC Program Application

Date Submitted: _____

Submit Gas HVAC Program Application by May 15, 2018, to info@conedisonresidential.com.

A. Distributor Information

Distributor Name:

Brands Carried:

Contact Name:

Street Address:

City:

State:

ZIP:

Phone:

Fax:

E-mail:

B. General Program Design

For 2017, please estimate the number of contractors purchasing from your company and installing qualifying equipment in Con Edison service territory:

For 2018, how many contractors do you anticipate participating?

Distributors are required to pass along a minimum of 50 percent of the incentive to the contractor. What percentage do you anticipate passing along to the contractor? And will that amount be the same for each contractor or each qualifying measure?

Do you expect to have any consumer promotions that could help you meet your program commitments? If yes, please detail below:

Please list the addresses of all the locations that would participate in the 2018 program:

C. Planned Training and Outreach

Outline plans for training or outreach your company plans to provide (in addition to any training provided by the program) that will contribute to the success of the 2018 Gas HVAC Program.

For Contractors:

For Your Internal Staff:

Please make arrangements as ICF/Con Edison would like to meet with Distributor staff twice per year.

How do you plan to generate initial interest among your contractors, and what role will your territory managers play in getting contractors interested?

Gas HVAC Program Application

How do you plan to follow up with contractors to ensure that they bring projects with qualifying equipment to you on a regular basis, and what role will your territory managers play in this follow-up?

D. Additional Documentation to Submit

Please use the tables below to provide good faith forecasts of the number of eligible systems in Con Edison territory that Distributor expects to complete by 2017 year-end and 2018 year-end. The equipment is listed by measure type. Please provide estimates for each equipment type for units that meet efficiency ratings versus those that do not qualify.

2017 Sales Totals in New York City and Westchester

HVAC Measure Type	Efficiency Rating	Quantity of Units Sold in 2017
Furnace	AFUE with $\geq 94\%$ with ECM Furnace Fan	
Hydronic Boiler	AFUE $\geq 90\%$	
Steam Boiler	AFUE $\geq 82\%$	
Indirect Water Heater	Attached to qualifying natural gas boiler	
Tank Water Heater	ENERGY STAR [®] rated ≤ 55 gallons: ≥ 0.67 energy factor > 55 gallons: ≥ 0.77 energy factor	
Tankless Water Heater	ENERGY STAR rated ≥ 0.90 energy factor	
Boiler Reset Control	Attached to qualifying natural gas boiler	
Qualifying Wi-Fi Thermostats	Controls natural gas heating equipment	
Thermostatic Radiator Valves (TRV)	Attached to existing radiator, convactor, or baseboard heater unit	

2018 Sales Totals in New York City and Westchester
