EDI 867MU Files

Con Edison has been experiencing some problems with the monthly usage (867MU) files for gas ESCOs since Monday, January 27th. Although readings have been processed, the monthly usage files have not been going out to our trading partners. We are currently investigating the problem and expect the files to go out on Monday, February 3rd.

This does not impact the processing of 810 Invoices or 820 Remittance files. We apologize for the inconvenience and appreciate your patience.
