Resending 814E responses with revised REFSG

We are resending 814E response transactions that were sent with the wrong value in the REFSG segment. We are in the process of revising and resending the affected files. You may receive duplicate rejected 814E responses, as we are resending all of the 814E transactions in the affected files.

Your enrollments should not have been affected. If you see an enrollment that was accepted but is not reflected in your sync list, please review for any 814D cancelling the pending enrollment.
