

## CECONY Duplicate Gas 867MUs

On July 10<sup>th</sup>, there was a glitch in a TCIS batch job. As a result, there were duplicate monthly usage entries placed in a staging table that were processed and sent via EDI. This was a one time occurrence and duplicate usage for over 10,000 accounts was sent.

The duplicate files were only sent for gas. There was no impact to any billing, and, there were no duplicate entries found after July 11<sup>th</sup>.

If you see duplicate 867MU files between July 10<sup>th</sup>, and 11<sup>th</sup>, we apologize for the inconvenience and please ask your EDI vendor to ignore them.
