Date Customer applied for required Franchise(s) \_\_\_/\_\_\_/\_\_\_\_\_

---

Customer acknowledges receipt of the following documents<sup>1</sup>:

- The Service Agreement, the Operating Procedure, the Standard Terms and Conditions, and;
- This Application.

This Application is hereby made for space in or upon Con Edison's conduits, manholes, transmission line rights-of-way, transmission towers, distribution poles,<sup>2</sup> river crossings, tunnels, interconnection with other service providers and/or the new construction of

---

<sup>1</sup> Rates under the Service Agreement are contained under Rider X – Rate for Use of Company Facilities for Telecommunications Purposes, of the electric rate schedule, P.S.C. No. 9 – Electricity

<sup>2</sup> Rates for attachments to Con Edison's electric distribution poles are contained under Rider K – Pole Attachment Rental Rate, of the electric rate schedule, P.S.C. No. 9 – Electricity, and all requests for such access shall be listed on this Application, but shall be handled in accordance with Rider K and other pre-existing Con Edison procedures including the Distribution Pole Attachment Standard Form of License and Distribution Pole Attachment Operating Procedures.

Underground Facilities (Con Edison Facilities) located on the attached sketch on Exhibit A - Route Request, which outlines Customer's proposed path. In the event that Customer does not have a sketch of a proposed path but is requesting Con Edison to locate an available path for it, Customer should outline its general path in sufficient detail for Con Edison's examination and attach the general path on Exhibit A.

In the event that existing Con Edison Facilities do not exist either in Customer's proposed path or in reasonable alternatives evaluated by Con Edison, and subject to Customer's acceptance of terms and conditions for the construction of new facilities, does Customer request that Con Edison construct new Underground Facilities for portions of Customer's path that can not be accommodated in existing Underground Facilities?

Yes \_\_\_\_\_

No \_\_\_\_\_

Is Customer requesting permission to use Con Edison's transmission line rights-of-way and/or transmission line towers?

Yes \_\_\_\_\_

No \_\_\_\_\_

Is Customer receptive to using Con Edison's distribution poles, where there are no available underground facilities?

Yes \_\_\_\_\_

No \_\_\_\_\_

Is Customer requesting permission to use Con Edison's tunnels or river crossings?

Yes \_\_\_\_\_

No \_\_\_\_\_

In the event that Con Edison determines upon review of its drawings and records that Customer's proposed path is unavailable, would Customer accept space in an alternative path consisting of existing facilities if Customer is provided the opportunity to review the alternative proposed path?

Yes \_\_\_\_\_

No \_\_\_\_\_

Con Edison will review this Application and prepare an estimate of the costs it will incur to perform an Engineering Record Search in order to determine the availability of Customer's route, as outlined in Exhibit A to this Application. The procedures governing Engineering Record Searches are described in §3.3.1 of the Operating Procedure attached herewith. The

APPLICATION NUMBER \_\_\_\_\_  
(to be completed by Con Edison)

Engineering Record Search will not start until payment of the estimated cost provided to the customer is received by Con Edison.

Customer's responsibilities pursuant to this Application relate solely to the commitment to provide information required by Con Edison to conduct the Engineering Record Search and to the commitment to provide payment based on the estimated costs.

Customer acknowledges that Con Edison shall not be required to perform any of the services herein if it is contended by any municipality having control over public right of way through which the services/occupancies are being requested that Con Edison is without authority to perform such services or permit such occupancies.
