

NYS Weather Ready Program

Success Story: Boosting Comfort & Efficiency At Home

Customer
David G.

Participating Contractor
Koala Insulation

Location
Westchester, NY

Overview

When David purchased his 100-year-old home, he knew it would need upgrades. Many areas were uninsulated, making the home uncomfortable and adding extra strain on the HVAC system. So, improving insulation quickly became a top priority.

Using Con Edison's **Find a Contractor** tool online, David found Koala Insulation—a Participating Contractor in the **Con Edison Weather Ready Program**. By working with a Participating Contractor, he was able to take advantage of program incentives and save on the cost of insulation.

"Con Edison's rebates are what allowed me to afford some of these improvements. I try to be savvy and smart about upgrades, and Con Edison makes it easy to do that," David said. "And ever since the work was done, it's been much more comfortable. I can go into my attic during the summer and it's not hot! I'm hoping to finish that space and the basement one day. That's the goal."

Highlights

Total Project Cost:

\$9,570

Con Edison Incentive:

\$2,000

Energy Savings:

~87 MMBtu

Testimonial

"The insulation has made our home more comfortable, and has even helped with blocking out some outside noise making the living space much quieter—an unexpected benefit!"

—David G.
