

Multifamily Energy Efficiency Program

2024 Fast Track Program

Fast Track Savings for Gas Measures

It's now even easier to earn incentives on gas-saving measures, such as boiler cleanings, tune-ups, and replacements; pipe and roof insulation; and energy management systems.

Pre-war multifamily buildings (built before 1940) with 5–50 units may be eligible to receive up to \$500 in incentives per dwelling unit.

Plus, we're waiving pre-installation inspection requirements and requiring post-inspections for select projects only, helping applicants get their projects installed faster.

Learn more at conEd.com/Multifamily.

Available Incentives:

Measure	Incentive	Incentive Unit
Energy Management System	\$150	Per DU
Boiler Clean & Tune	\$500	Per building
Boiler Replacement	\$500	Per DU
Pipe Insulation	\$3,000	Per building

All projects are capped at 85% of the project cost.
