# You've Been Selected To Join the Energy Exchange Program

Switch to Electric Appliances With New Incentives!

## Take Advantage of Incentives To Go All Electric

If you're connected to an aging gas service line that will be due for replacement in the coming years, you can **get up to \$20,000** in incentives to switch to state-of-the-art, high-efficiency appliances through the **Energy Exchange Program**. Program capping rules apply.

Say goodbye to your gas account and future gas bills!\*

## Get Started Today

1. Visit [conEd.com/EnergyExchange](https://conEd.com/EnergyExchange) and submit an Interest Form
2. Be assigned a dedicated Account Manager who guides you through the process and answers any questions
3. Receive a free home assessment and upgrade recommendations
4. A Participating Contractor installs your new electric appliances—no need to get your hands dirty

Don't wait—take advantage of this offer now!

## Why Switch to Electric Appliances?

### Electric Induction Stove Benefits:

Induction stoves use electromagnetic induction technology, the fastest and most precise way to cook food. Since there's no open flame, there are no fumes and a reduced risk of fire, burns, or accidents. Plus, cleaning is a breeze as they have a responsive smooth surface (no grates) that only turns on when a pan sits on top and cools down fast after use.

### Heat Pump Water Heater Benefits:

These water heaters are up to four times more energy efficient when compared to conventional water heaters.\*\* They also pose no risk of carbon monoxide leaks.

### Heat Pump Clothes Dryer Benefits:

These dryers use less energy and are highly efficient. They dry laundry at low temperatures, so the process is gentler on clothes. They're also easy to install and don't require ventilation.

### Electrical Panel Upgrade Benefits:

An all-electric building needs sufficient amperage, circuits, and new breakers for each appliance. Your existing panel will also be evaluated and upgraded if necessary. This can help set up your building for more outlets, an electric vehicle, or solar panels in the future.

\*Use natural gas to heat your home? You also have access to thousands in incentives to install dual heating and cooling through the Clean Heat Program. Visit [conEd.com/CleanHeat](https://conEd.com/CleanHeat) to learn more.

# Ha sido seleccionado para unirse al Programa de Intercambio de Energía

¡Cámbiese a electrodomésticos  
eléctricos con nuevos incentivos!

## Aproveche los incentivos para pasarse a electrodomésticos eléctricos

Si está conectado a una línea de servicio de gas antigua que se sustituirá en los próximos años, puede **recibir hasta \$20,000** en incentivos para cambiarse a electrodomésticos de última generación y alta eficiencia a través del **Programa de Intercambio de Energía**. Rigen topes máximos para el programa.

¡Cierre la cuenta y despídase de las facturas de gas!\*

## Comience hoy mismo

1. Visite [conEd.com/EnergyExchange](https://conEd.com/EnergyExchange) y envíe un Formulario de interés.
2. Se le asignará un administrador de cuenta, que lo orientará durante el proceso y responderá sus preguntas.
3. Recibirá una evaluación gratis del hogar y recomendaciones para implementar mejoras.
4. Un contratista participante instalará sus nuevos electrodomésticos eléctricos. ¡Usted no deberá hacer nada! No espere. ¡Aproveche esta oferta ahora!

## ¿Por qué cambiarse a electrodomésticos eléctricos?

### Beneficios de la estufa de inducción eléctrica:

Las estufas de inducción utilizan tecnología de inducción electromagnética, la forma más rápida y precisa de cocinar alimentos. Como no hay llama abierta, no hay humo y se reduce el riesgo de incendio, quemaduras o accidentes. Además, la limpieza es muy fácil, ya que tienen una superficie suave y sensible (sin rejillas) que solo se enciende cuando se coloca una olla en la parte superior y se enfría rápidamente después de usarla.

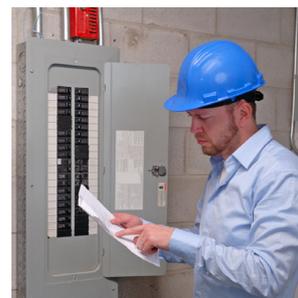

### Beneficios del calentador de agua con bomba de calor:

Estos calentadores de agua ahorran hasta cuatro veces más energía que los calentadores convencionales.\*\* Tampoco representan ningún riesgo de fugas de monóxido de carbono.

### Beneficios de la secadora de ropa con bomba de calor:

Estas secadoras consumen menos energía y son muy eficientes. Al secar a bajas temperaturas, no se maltrata la ropa. También son fáciles de instalar y no requieren ventilación.

### Beneficios de la renovación del panel eléctrico:

Un vivienda totalmente eléctrica necesita suficiente amperaje, circuitos y disyuntores nuevos para cada electrodoméstico. También se evaluará su panel actual y, de ser necesario, se lo renovará. Esto puede preparar la vivienda para más tomacorrientes, un vehículo eléctrico o paneles solares en el futuro.

\* ¿Usa gas natural para calefaccionar su casa? También tiene acceso a miles de dólares en incentivos para instalar climatizadores duales de frío y calor a través del Programa Calor Limpio. Visite [conEd.com/CleanHeat](https://conEd.com/CleanHeat) para obtener más información.

## 您已获选加入能源转换计划

借助全新激励措施，转换使用电器设备！

## 充分利用激励措施，全面开启电气化生活

如果您连接的是未来几年将需更换的老旧天然气服务管线，则可通过**能源转换计划**获得最高**2 万美元**的激励金，用于更换为先进、高效的电器设备。计划上限规则适用。

和您的燃气账户及未来的燃气账单说再见！\*

## 立即行动

1. 访问 [conEd.com/EnergyExchange](https://conEd.com/EnergyExchange) 并提交意向表
  2. 我们将为您指派一位专职的客户经理，全程提供指导并回答任何问题
  3. 获得免费的房屋评估和升级建议
  4. 由参与承包商为您安装新电器设备，无需亲力亲为
- 机不可失，立即享受此优惠！

## 为何要转换使用电器设备？

### 电磁炉的好处：

电磁炉采用电磁感应技术，是目前速度最快、控温最精准的烹饪方式。由于无需明火加热，电磁炉在使用过程中不会产生烟雾，可降低发生火灾、烫伤或各类安全事故的风险。此外，电磁炉清洁尤为便利——采用灵敏且光滑无格栅的面板设计，并搭载“锅具感应启动”与“快速冷却”技术，让日常打理更加轻松省心。

### 热泵热水器的的好处：

与传统热水器相比，此类热水器的能效可高出四倍。\*\* 同时，还能杜绝一氧化碳泄漏的风险。

### 热泵干衣机的好处：

此类干衣机能耗低、效率高。它们采用低温烘干技术，因此对衣物的护理过程更为温和。不仅如此，此类电器还易于安装，而且无需通风。

### 配电板升级的好处：

一栋完全电气化的建筑需要足够的安培容量、合理的电路布局，以及为每台电器设备独立配置新型断路器。如有必要，还将对您现有的配电板进行评估和升级。这将助力您的建筑提前做好电力规划，为未来增设更多电源插座、接入电动汽车充电设施或安装太阳能电池板做好适配准备。

\*还在使用天然气为房屋供暖？您亦可通过清洁供暖计划获得数千美元的激励金，用于安装双制式冷暖系统。请访问 [conEd.com/CleanHeat](https://conEd.com/CleanHeat) 了解更多信息。

# Have Solar Panels? Join the Energy Exchange Program

Get up to \$20,000 To Switch to  
Efficient Electric Appliances!

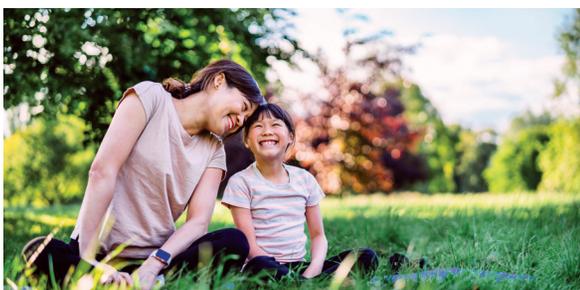

## Benefits of the Energy Exchange Program:

You can take the next step in your clean energy transition by pairing your solar panels with efficient electric appliances—for less!

Say goodbye to your gas account and future gas bills while using solar credits to lower your electric expenses.\*

Lower your carbon footprint even further to help ensure a cleaner environment for generations to come.

## Take Advantage of Incentives To Go All Electric

If you are connected to an aging gas service line that will be due for replacement in the coming years, you can **get up to \$20,000** in incentives to switch to state-of-the-art, high-efficiency appliances through the **Energy Exchange Program**. Program capping rules apply.

## You've Been Selected To Join the Energy Exchange Program

You may be connected to an aging gas service line that will be due for replacement soon. Get up to **\$20,000 in incentives** to switch to state-of-the-art, high-efficiency appliances through the **Energy Exchange Program**.

You'll be able to say goodbye to your gas account and future gas bills!

### Why Switch to Electric Appliances?

**Electric Induction Stove Benefits:**  
Electromagnetic induction allows you to cook food faster and more precisely. No open flames means reduced fumes, fires, and risk of burns. The smooth, responsive surface activates only when cookware is placed on it and cools quickly for easy cleanup.

**Heat Pump Water Heater Benefits:**  
Poses no risk of carbon monoxide leaks. Up to four times more energy efficient than conventional water heaters.\*

**Heat Pump Clothes Dryer Benefits:**  
Gentler on clothes, energy-efficient, easy to install, and no venting required.

Also, your electrical panel will be assessed and upgraded if needed—making room for new appliances.

# Success Story: Boosting Home Comfort & Efficiency

Customer  
**Requel Russell-George**

Participating Contractor  
**Phoenix Home Consultants**

Location  
**The Bronx, NY**

## Testimonial

I have always cared deeply about the environment and wanted better air quality in my home. I'd been enrolled in Con Edison's Smart Usage Rewards Program for a few years, and when my oven stopped working, I knew it was the right time to join the **Energy Exchange Program** as well.

Upgrading my stove and other appliances at no cost was a true blessing. I hadn't realized when I joined the program that I'd also be able to improve my home's comfort. Now, with targeted air conditioning and heating in the most-used spaces, my home feels much more comfortable year-round.

Before the upgrades, my gas furnace struggled to keep my home warm, no matter how high I set the thermostat. Plus, with the intense summer heat waves recently, my family and I would have struggled immensely if not for the mini-split units that helped keep my home cool. The induction stove also makes cooking easier and faster—it boils water rapidly, and having a working oven again is priceless.

The entire process went very smoothly—the project manager and contractor made the incentive process seamless, and the installation was completed on time.

Don't think twice about participating in the program. It has proven to be a win for me, and I would love for others to benefit from this life-changing opportunity as well.

—**Requel Russell-George, Homeowner**

## Energy Exchange Program

# Success Story: Better Home Efficiency & Air Quality

Customer  
**Gem Lucas**

Participating Contractor  
**Phoenix Home Consultants**

Location  
**The Bronx, NY**

### Testimonial

Our century-old home in the Bronx, NY, was experiencing frequent power loss, and we wanted to make it more energy efficient while improving indoor air quality. I discovered Con Edison's **Energy Exchange Program**, which offered a healthier, safer, and more environmentally friendly way to improve our home—all at minimal cost.

At first, it seemed too good to be true, but the entire process was seamless. The program sent a representative who was very knowledgeable and responded diligently to all our questions. After a detailed survey of our home, he gave us clear, step-by-step instructions on what would happen next, and everything went exactly as he described.

The installation coordination was remarkable. Contractors from three different companies worked together seamlessly on the home, all focused on completing their tasks efficiently. I was genuinely impressed by the craftsmanship each of them displayed, and we didn't have to lift a finger.

Now, we have mini-splits that provide both heating and cooling, eliminating the need for separate systems. We've also switched to an induction stove, which heats faster, offers precise temperature control, eliminates possible gas leaks, and keeps our air healthier by removing toxins like carbon monoxide and nitrogen dioxide produced by gas stoves. Plus, we received a high-efficiency clothes dryer and no longer have issues with our electrical panel.

The most exciting overall benefit has been the increased energy efficiency and electrical reliability, which boosted our home's value, making it even more attractive to future buyers.

—**Gem Lucas, Homeowner**

# Success Story: Boosting Home Comfort & Efficiency

Customer  
**Florence Dryden**

Participating Contractor  
**Phoenix Home Consultants**

Location  
**Westchester, NY**

## Testimonial

While charming, my over-a-century-old home needed some energy-efficient upgrades that would also help lower monthly costs. When I discovered **Con Edison's Energy Exchange Program**, I had to take advantage of the opportunity to switch to electric appliances with incentives that covered 99% of the cost!

With support from **Phoenix Home Consultants**, we installed a heat pump water heater, induction range, electric dryer, and upgraded my electrical panel. The contractors were courteous, professional, and truly provided excellent service.

Since the upgrades, I've already noticed big benefits. I'm no longer worried about gas use and I love how quickly the induction range heats up. The larger, more powerful water heater delivers hot water to the second floor faster. And I'm thrilled with the upgraded electrical panel.

The whole process was seamless from start to finish. To anyone thinking about joining the Energy Exchange Program, my advice is: don't wait—it's phenomenal and saved us thousands of dollars. We're forever grateful!

## Energy Exchange Program

# Success Story: Boosting Home Comfort & Efficiency

Customer  
**Huajun Li**

Participating Contractor  
**Sunny HVAC**

Location  
**Floral Park, NY**

### Testimonial

My house was built in 1940 and has plenty of character but the appliances were showing their age. When I found out about **Con Edison's Energy Exchange Program**, I took the opportunity to upgrade to energy-efficient technology, reduce energy costs, improve air quality, and increase comfort—all at no cost.

Through the program, I worked with **Sunny HVAC** to install an induction range, an electric dryer, and a heat pump water heater. The process took about four to six months, and I appreciated how responsive and communicative the Con Edison program team was throughout.

Since the upgrades, I've been very pleased with the results. The heat pump water heater runs quietly and delivers hot water just as reliably as before. The induction range makes cooking faster, the electric dryer is quieter, and the air inside feels cleaner. Plus, switching to electric appliances has also lowered my previously high operating costs of the old gas dryer and stove.

I encourage other homeowners to take advantage of the Energy Exchange Program as a way to make sustainable, forward-thinking improvements that provide lasting comfort and efficiency.

# Success Story: Boosting Home Efficiency & Savings

Customer  
**Victoria Augustine**

Participating Contractor  
**Phoenix Home Consultants**

Location  
**Queens, NY**

## Testimonial

My home, now 80 years old, has been mine since 1984, when I was 25. I've always dreamed of switching to electric appliances, moving away from gas, and embracing modern technology, but financing the project alone wasn't possible. When I discovered **Con Edison's Energy Exchange Program**—which covered 100% of the project cost—I knew I had to take advantage.

Working with **Phoenix Home Consultants**, I upgraded to a heat pump water heater, an induction range, and a ventless electric dryer. The installation was smooth, and communication with the contractors was easy.

The results have been amazing. Closing my gas account and adopting the heat pump technology has cut my bill nearly in half. The ventless dryer's wrinkle-free feature means I no longer have to use dryer sheets, which is better for my clothes and the environment. My husband—who once believed gas was the only way to cook—now loves his induction stove because it heats faster than gas. And our heat pump water heater gives us hot water 24/7.

I've been recommending the program to neighbors and plan to invite them over to see the upgrades in person. Seeing is believing!
